Art Unit: 2672

Claim 8 (currently amended)

A computer-readable recording medium, said medium storing a program for executing a data displaying method in said computer system that includes a computer with a database; a display device; and a pointer for entering a position on the screen of said display device, said method comprising: displaying a main graph by reading data from said database and plotting said data on the screen of said display device with respect to a first variable for a plurality of values of a second variable; determining whether or not an input from said pointer is a request for plotting data related to [a] said second variable; determining coordinate data of a position of said main graph displayed on said screen of said display device; and searching said coordinate data of said position from said database; ~~said position from~~ wherein if said input from said pointer is a request for plotting data related to said second variable, the method further comprises: reading coordinate data of said position from said database; displaying a window at a position within said main graph while plotting of data related to said second variable is requested from said pointer; and plotting coordinate data of said position in said window with respect to said plurality of values of said second variable, so that said data with respect to said first variable and said data with respect to said plurality of values of said second variable are simultaneously displayed.
